

***** **RESET THIS PC** *****

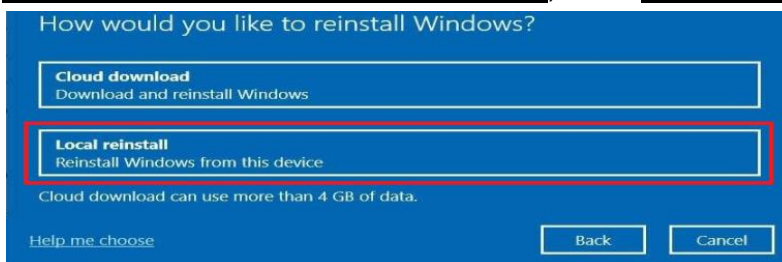

This will Reset back to “First Use”; ALL DATA WILL BE ERASED, BACK UP FIRST

- On the Windows Desktop, in the bottom left corner click on: “  Type here to search”. Type in “Reset this PC” and press Enter.
- A Recovery popup screen will appear; under Reset this PC, click on “Get started” and follow the steps below:

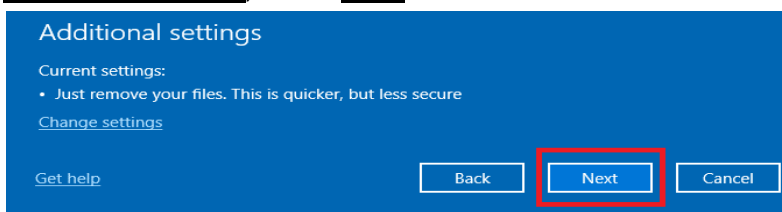

- Choose an option; click “Remove everything” we recommend this option

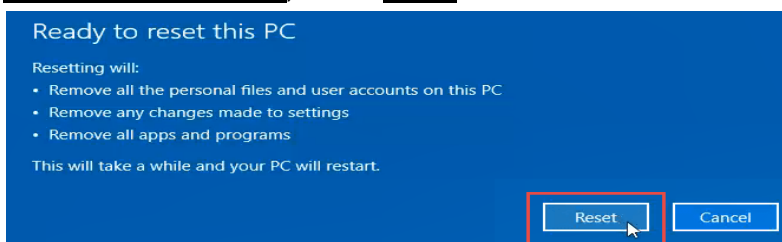

- *** If you are connected to the internet it will ask:
How would you like to reinstall Windows?; click “Local reinstall”; if not than it will go onto the next screen.

- Additional settings; Click “Next”

- Ready to reset this PC; Click “Reset”

- Preparing to reset; this takes couple minutes to prepare then the computer will automatically restart.
****During this do not unplug or turn off the computer.** The computer will re-image back to the original setting when it was first delivered to you. Follow the same setup steps listed above.
