Thank you for your purchase with us. We value each and every customer and want to earn your future business.  
100% customer satisfaction is our top priority!

If you have any issues or trouble getting the computer to start, please email us at:  
[Support@JSMcomputers.com](mailto:Support@JSMcomputers.com) or call us at **(405) 241-8300** and we will fully help you.

## Setup for the first time you power on your computer:

1. "Set Up Windows" will appear; Leave these settings alone: Country/Region, Time/Currency, Keyboard layout and click **Next**.
2. "Type a user name"; type in a user name and click **Next**.
3. "Set a password for your account"; enter a password for your account, **if you do not want a password leave the box blank**. If you do enter a password, you must remember it for each time you start your computer (case sensitive), click **Next**.
4. "Microsoft Software License Terms"; Click little box next to *I accept the license terms*, click **Next**.
5. "Help protect your computer and improve Windows automatically", click **Use recommended settings**.
6. "Review your time and date settings"; change to your time zone, check your date/time, and click **Next**.
7. If you are connected to the internet "Select your computer's current location" screen will appear. Choose either "**Home, Work, Public**".
8. Windows is finalizing your settings; Welcome; Preparing your desktop...
9. Computer will now boot to Windows desktop, setup is completed.

## Tips:

- **Your computer already has Windows loaded; DON'T use the enclosed recovery CD to start.** Using the recovery CD should be the last resort and done by a trained PC technician only!
- Windows 7 comes pre-activated.
- Your Windows 7 license/product key (COA) is attached to the computer itself; it's a 1"x 3" colored sticker. **Do NOT remove this sticker, we do not keep the product key on file and won't be able to supply a replacement.**
